*Cause: Self-evident.

*Action: Remove the extra key.

Table TASKS created.

3 rows inserted.

TASK#3).

Oracle SQL Developer : HR

The screenshot displays the Oracle SQL Developer interface with the 'HR' schema selected in the Connections pane. The main window shows a SQL script in the Worksheet area, which defines a table 'tasks' and inserts data into it. The script is as follows:

```
task_id NUMBER ,
title VARCHAR2(255) NOT NULL UNIQUE,
name VARCHAR2(100),
start_date Date,
due_date Date,
priority NUMBER(1) DEFAULT 3 NOT NULL,
description CLOB,
Primary Key(task_id)
);

INSERT ALL
INTO tasks (task_id, title, name, priority)
VALUES (1, 'Database Design', 'Ali Khan', 1)
INTO tasks (task_id, title, name, priority)
VALUES (2, 'API Development', 'Sara Khan', 2)
INTO tasks (task_id, title, name, priority)
VALUES (3, 'Frontend UI', 'Hamid Ali', 3)
SELECT * FROM dual;

INSERT INTO Tasks (task_id, title, name, priority)
select 4, 'repare HR Report', HR.EMPLOYEES.FIRST_NAME || ' ' || HR.EMPLOYEES.LAST_NAME, 2
from HR.EMPLOYEES
where HR.EMPLOYEES.EMPLOYEE_ID = 101;
```

The Script Output pane shows the execution results, indicating that the task was completed in 0.068 seconds. It also displays error messages for the INSERT statement, stating that the 'NAME' column is an invalid identifier. The final output shows '1 row inserted.'

Task completed in 0.068 seconds

Error at Command Line : 22 Column : 29

Error report -

SQL Error: ORA-00904: "NAME": invalid identifier

00904. 00000 - "%s: invalid identifier"

*Cause:

2

TASK#16).

Oracle SQL Developer : HK

The screenshot displays the Oracle SQL Developer environment. On the left, the 'Connections' pane shows a tree view of the 'HR' schema, including tables, views, indexes, and other database objects. The 'Reports' pane below it lists various report types. The main workspace is divided into a 'Worksheet' and a 'Query Builder'. The 'Worksheet' contains several SQL queries: two 'UPDATE' statements for the 'Tasks' table, and three 'SELECT' statements. The first 'SELECT' statement counts tasks by priority, the second calculates the average priority, and the third finds the maximum priority. The last 'SELECT' statement is highlighted and shows the results in the 'Query Result' pane at the bottom. The 'Query Result' pane shows a single row with a priority of 1 and a total count of 1.

```
UPDATE Tasks
set title = 'Update Employee Data'
where task_id =5;

UPDATE Tasks
set priority = 2
where priority = 3;

SELECT priority,COUNT(*) AS total_taask
from tasks
GROUP BY priority;

SELECT AVG(priority) AS AVG_PRIORITY
FROM Tasks;

SELECT MAX(priority) AS MAX_PRIORITY
FROM Tasks;

SELECT priority,COUNT(*) AS TOTAL
FROM Tasks
where title like '%Report%'
group by priority;
```

PRIORITY	TOTAL
1	1

TASK#22).

Oracle SQL Developer : HR

The screenshot displays the Oracle SQL Developer interface. On the left, the 'Connections' pane shows the 'HR' schema selected under the 'h' connection. The 'Query Builder' tab is active, showing a SQL query. The query is as follows:

```
where priority > 1;

SELECT priority, count(*) as total_count
from Tasks
group by priority
having count(*) > 1;

SELECT *
FROM Tasks
order by title ASC;

SELECT *
FROM Tasks
order by priority desc, title ASC;

SELECT *
FROM Tasks
order by priority ASC;

INSERT INTO Tasks
select * FROM tasks archive;
```

TASKSARCHEIVE TABLE NOT GIVEN,

TASK#23).

Oracle SQL Developer : HR

The screenshot displays the Oracle SQL Developer interface for the HR schema. The left pane shows the 'Connections' tree with the 'HR' schema selected. The right pane shows the 'Query Builder' tab with four SQL queries:

```
SELECT priority, count(*) as total_count
from Tasks
group by priority
having count(*) >1;

SELECT *
FROM Tasks
order by title ASC;

SELECT *
FROM Tasks
order by priority desc, title ASC;

SELECT *
FROM Tasks
order by priority ASC;

INSERT INTO Tasks
select *
from tasks_archive
where priority =2;
```

TASKS ARCHIEVE NOT THERE

*Action:

1 row inserted.

TASK#25).

Oracle SQL Developer : HR

The screenshot displays the Oracle SQL Developer interface with the 'HR' schema selected in the Connections pane. The main window shows a SQL script in the Worksheet tab. The script includes a query to select tasks ordered by priority, an insert statement into the 'tasks' table, and a truncate statement. The script is as follows:

```
FROM Tasks
order by priority desc,title ASC;

SELECT *
FROM Tasks
order by priority ASC;

INSERT INTO Tasks
select *
from tasks_archive
where priority =2;

INSERT INTO tasks (task_id, title, name, priority)
VALUES (
6,
'Employee Task',
(SELECT HR.EMPLOYEES.FIRST_NAME || ' ' || HR.EMPLOYEES.LAST_NAME FROM HR.EMPLOYEES WHERE HR.EMPLOYEES.EMPLOYEE_ID = 101),
3
);

TRUNCATE TABLE Tasks;
```

The bottom pane shows the 'Script Output' tab with the following error message:

```
Error starting at line : 102 in command -
INSERT INTO tasks (task_id, title, name, priority)
VALUES (
6,
'Employee Task',
(SELECT name FROM HR.EMPLOYEES WHERE HR.EMPLOYEES.EMPLOYEE_ID = 101),
3
)
Error at Command Line : 106 Column : 13
Error report -
SQL Error: ORA-00904: "NAME": invalid identifier
00904. 00000 -  "%s: invalid identifier"
*Cause:
*Action:

1 row inserted.

Table TASKS truncated.
```
